

## Quit Smoking Drugs

Have you or a loved-one struggled with an addiction to cocaine, opium, crystal meth or heroine? You may wonder if the recoveries from such devastating addictions are possible. The answer to this question is "yes" provided that you get the right therapy and that you use safe treatments in achieving detoxification. Here at [www.powertop.com](http://www.powertop.com), you can explore one of the most innovative herbal solutions to help with the addiction to smoking drugs. Power Top is a 100% natural herbal remedy, originally formulated half-a-century ago in China. Many herbalists believe that the ingredients in Power Top have potent capabilities to help people [quit smoking drugs](#) and to recover from residual toxic effects that meth, cocaine, and heroine can have on the body. Many people, who have used Power Top report they have been able to quit smoking drugs, quit heroine, quit cocaine and quit crystal meth without suffering certain side-effects, such as drowsiness, nausea, and influenza-like symptoms.

Power Top should be used in conjunction with a doctor-recommended detoxification and recovery program. Recent research suggests that, for an addict to permanently quit smoking drugs, he or she must confront the root provocation that has derived to the drug abuse. In some cases, childhood traumas create a sense of powerlessness. By using cocaine, heroine, or other drugs, addicts seek to re-empower themselves -- even though the result is often severe disempowerment. In other cases, the root cause of addiction can be completely different. For instance some people who suffer excruciating conditions get hooked on drugs simply for the palliative, pain-killing effect.

In order to get rid of the addiction and "quit" heroine, crystal meth, or crack cocaine for ever, you need more than a solid detoxification system. You need to explore the underlying physiological and psychological traumas deriving to the drug usage. Lose the self-blame and do not buy into any treatment regimen until you see scientific facts that a program actually has helped individuals.
